courses.

Gearing up with tech and engineering

UNIVERSITI Kuala Lumpur Malaysian Spanish Institute (UniKL MSI) provides quality engineering programmes to meet the high demand for engineering and technology graduates.

Since 2002, the campus in cooperation with the Spanish government has offered courses in diploma and bachelor in engineering technology.

UniKL MSI specialises in Mechanical, Manufacturing and Automotive Engineering courses which include Electrical and Electronics.

UniKL MSI offers three diploma courses in Engineering Technology in Electromechanical Installation and Maintenance, Engineering Technology in Mechanical Design and Development and Engineering Technology in Automated Regulation and Control.

UniKL MSI also offers the Bachelor of Engineering Technology programme in the fields of Mechanical, Mechatronics, Manufacturing, Automotive and Applied Electronic.

There is also Bachelor in Mechanical Engineering with Honours offered at the Kulim Hi-Tech Park campus.

The programme focuses on all types of mechanical systems design and development including automotive. It also deals with thermodynamics, heat transfer, structures and materials, fluid dynamics and

advanced control systems.

Automotive engineering mainly focuses on the design, manufacture and operation of engines and cars. Not only do students get theoretical training they also get to work on machines and engines.

Moreover, when continuing their studies at the campus, students will be able to apply the soft and hard skills so that they will be prepared to meet the requirements when starting out on their career.

Rather than focusing in their area of specialisation, they will be exposed to other fields such as management, business practices, leadership and entrepreneurship as an added value.

They will not only learn about engineering but will also gain knowledge on starting their own business upon graduation.

Students will also be provided with practical training.

In addition to technical skills, UniKL MSI also stresses on communication skills through activities and programmes organised by the university in an interactive learning environment.

As UniKL MSI shares the technology and expertise with Spain, it provides hi-tech workshops and laboratories fitted with modern equipment, apparatus, machines and tools from Spain.
