Question 1

Synergy Corp is trying to estimate its needs for funds during each of the months covering the last quarter of 2024. All the information needed is given below:

MONTH	TOTAL SALES (RM)
June	55,000
July	60,000
August	70,000
September	75,000
October	66,000
November	57,000
December	53,000

- a) In past, 10% of sales were on a cash basis, and the collections were 40% in the month, 30% in the second month and 20% in the third month following the sales.
- b) Purchases are 60% of each month's sales, 15% of which are paid in cash, 65% are paid one month later and the rest is paid two months after purchase.
- c) The monthly rent and loan payments are RM2,000 and RM1,000 respectively, to be paid every month.
- d) Utilities for the firm average 2% of sales and are paid in the month of their incurrence.
- e) An amount of RM1,500 interest will be paid in November and taxes amounting RM6,200 payable in December.
- f) Wages and salaries amount to RM1,000 plus 5% of sales in each month.
- g) September's ending cash balance is RM11,260 and the company has a policy of maintaining a minimum cash balance of RM10,000.

As a Financial Manager, you are required to prepare a cash budget for Synergy Corp for the last quarter of 2024.

Question 2

XYZ Corporation plans to expand its production plant, requiring RM100 million in funding. To finance this project, the company has decided to use long-term financing and is considering three potential alternatives.

The first alternative involves issuing a 12-year bond with a coupon rate of 8% per annum. These bonds will be sold at a 30% premium over their par value, with a flotation cost of 1% of the selling price.

The second alternative is to issue preferred stock with a selling price of RM20 per share. These stocks will pay a dividend equivalent to 3% of their par value. The issuance cost for this option is 2% of the par value.

The third alternative is to issue common stock with a selling price of RM50 per share. The company has recently paid a dividend of RM0.50 per share, and future dividends are expected to grow indefinitely at a rate of 5% per year. The flotation cost for the common stock is 0.6% of the selling price.

XYZ Corporation will analyse these alternatives to determine the most suitable and cost-effective financing strategy for the expansion. Currently the firm maintains its capital structure as follows:

<u>Capital</u>	<u>Amount</u>
Debt	RM10,500,000
Preferred stock	RM 4,500,000
Common stock	RM15,000,000

a) Assuming that the marginal tax rate is 30%, you are required to:

- i. Calculate the before-tax and after-tax cost of debt for the firm. (6 marks)
- ii. Calculate the cost of preferred stock. (4 marks)
- iii. Calculate the cost of common stock. (5 marks)
- iv. Calculate the Weighted Average Cost of Capital (WACC) for XYZ Corporation. (6 marks)

b) Define the cost of capital and explain its importance in financial decision-making. (4 marks)

Question 3

- a) You recently received an inheritance and decided to invest the money instead of spending it. Your financial advisor, Mr. Jamal, has provided information on two stocks: Teslah stock and Microsoftea stock. Using the knowledge you have gained during your degree, you aim to evaluate the performance of these stocks. Below is the information provided by your advisor:

State of Economy	Probability	Rate of return	
		Microsoftea	Teslah
Recession	0.25	5	10%
Norma	0.50	25%	15%
Boom	0.25	40%	50%

- i. Calculate the expected return for these two stocks.

(4 marks)

- ii. Compute the standard deviation for both stocks.

(6 marks)

- iii. Suppose you have RM25,000 total. If you decide to invest RM15,000 in Teslah stock and RM10,000 in Microsoftea stock, calculate the expected return and standard deviation of your portfolio.

(8 marks)

- iv. Based on your calculations, evaluate which strategy would be better: investing in a single stock or combining both stocks in a portfolio. Justify your answer.

(3 marks)

- b) Explain risk and return trade-off.
