n. <u>-</u>		
	i. ii. Explain briefly i. ii. Explain briefly i ii i.  i. 	i.

(4 marks)

CONFIDENTIAL

#### **QUESTION 3**

Given the welding symbol as shown below **Figure 2**, explain in full with the aid of a diagram, the information conveyed through it.

(4 marks)

#### **QUESTION 4**

a) List three (3) detrimental effects of notches in a welded structure.	
	(6 marks)
b) List <b>three (3)</b> weld defects that create significant notch effects.	
	(6 marks)
c) What factors give at least three (3) are taken into account when selecting and des	signing a
joint for a welding application?	
	(6 marks)
QUESTION 5	
a). List three (3) reasons for having an "Inspection and Test Plan (ITP)".	
	(6 marks)
b). List three (3) components or elements of a typical ITP.	
	(6 marks)

#### **SECTION B (Total: 40 marks)**

#### **ASNSWER ALL QUESTION**

#### **QUESTION 1**

Erecting structural steelwork for building construction takes place in a dynamic, changing environment where there are many hazards and risks. Proper and timely planning and coordination are the most effective ways to manage those hazards and risks. Projects involving structural steel construction have four main stages, where risks to health and safety need to be considered.

- a) Identify the **four (4)** main stage of that kind involvement. (4 marks)
- b) Explain briefly the parties with roles and responsibilities at the various stages of projects are:

(16 marks)

#### **QUESTION 2**

The erector, in consultation with the builder, erection engineer and other parties involved in the work, needs to plan the process for lifting and erecting individual members.

Explain briefly the precaution to managing risk at the erection stage;

a) Before erection, to avoid collapse, the erector should:

(10 marks)

b) During erection, to avoid collapse, the erection supervisor must:

(10marks)
