PRODUCT DESCRIPTION

‘Smart Key Dispensing System’ was designed for Holiday Home and also known as Guest House.

From a conducted survey, it was found that about 77% of house owners experienced problems that they have to hand over the house key to their customers while working hours or at hours sometimes inconvenient to them. Hence, this project aims at accommodating the owners who find it difficult to deliver and collect the house key from customers.

ORIGINALITY & NOVELTY

- Smart key dispensing is used to make it easier to deliver the key to the customer at any time compared to Common key dispenser
- Smart key dispensing using keypad to key in password and display at the LCD compare to Common key dispenser that did not have keypad
- Smart key dispensing is using metal sheet for difficult minted by the thief compare to the common key dispenser that is using plastic

PRODUCT FEATURES / CAPABILITIES

Smart Key Dispensing System
1. Mobile phone friendly
2. Controlled by PIC and using:
   - GSM,
   - sensor,
   - buzzer,
   - light indicator,
