
MCMC initiative to develop digital talent

KUALA LUMPUR: The Malaysian Communications and Multimedia Commission (MCMC) on Tuesday signed cooperation documents with several local and global institutions in efforts to develop national digital talent and empower the digital economy through strategic collaboration.

In a statement, MCMC said the local institutions involved were Universiti Kuala Lumpur (UniKL), Malaysia Board of Technologists (MBOT) and the Malaysian Nuclear Agency.

The signing ceremony was witnessed by MCMC chief operating officer Datuk Mohd Ali Hanafiah Mohd Yunus.

The collaboration with UniKL will be established through a micro-credential development programme that will provide opportunities for adults, especially workers, to add value to their skills in order to remain relevant in their respective careers.

Meanwhile, the collaboration with MBOT and the Malaysian Nuclear Agency will focus on developing certification programmes related to technology, especially in telecommunications

and broadcasting, cybersecurity, computing and radiofrequency electromagnetic fields. – Bernama
