

Preparing work-ready graduates

> FROM PAGE 9

In our Bachelor's of Aviation Management programme, we prepare our graduates to be equipped with each specific aviation spectrum knowledge and competencies to ensure they are ready to contribute to the aviation industry once they graduate. We work hand in hand with the industry, professional bodies, authorities and regulators to continuously be aligned with what's happening in the industry.

Our Subang campus is also built in tangent with the teaching factory concept where our industry partners operate from our campus compound. It is using this concept that our students are exposed to the aviation working environment and community while gaining their student experiential life with UniKL MIAT. – **By ASSOC PROF DR NOR AIDA ABDUL RAHMAN**

Assoc Prof Dr Nor Aida Abdul Rahman is the Head of Aviation Management at UniKL MIAT. She has published a number of edited books in aviation, air travel, logistics and supply chain. She also received a number of funding from multiple organisations to conduct research related to the aviation management field. She can be contacted at noraida@unikl.edu.my

contacted at horrida@unikl.edu.my.
