Document No : UniKL MFI\_SD\_AC41 Revision No: 02

Effective Date: 01 December 2008

# SET A

## UNIVERSITI KUALA LUMPUR

### MALAYSIA FRANCE INSTITUTE

## FINAL EXAMINATION

## **JANUARY 2014 SESSION**

SUBJECT CODE : FFD 22602

SUBJECT TITLE : BASIC PRESSURE VESSEL DESIGN

LEVEL : DIPLOMA

TIME/DURATION :

(2.0 HOURS)

DATE :

### **INSTRUCTIONS TO CANDIDATES**

- 1. Please read the instructions given in the question paper CAREFULLY.
- 2. This question paper is printed on both sides of the paper.
- 3. Please write your answers on the answer booklet provided.
- 4. Answer should be written in blue or black ink except for sketching, graphic and illustration.
- 5. This question paper consists of ONE (1) section. Answer all questions.
- 6. Answer all questions in English.
- 7. No graph paper is appended.

THERE ARE 6 PRINTED PAGES OF QUESTIONS, AND NO PAGE OF GRAPH PAPER EXCLUDING THIS PAGE.

**INSTRUCTION:** Answer ALL questions.

Please use the answer booklet provided.

Wha	at are the TWO (2) methods for measuring corrosion?	
A.	Chemical process and telltale holes.	
B.	Corrosion process and telltale holes.	
C.	Telltale holes and corrosion gauges.	
D.	Holes with telltale holes and corrosions.	(2 marks)
The	initial information to design a pressure vessel are	
A.	Chemical process and electrical process.	
В.	Design pressure and design process.	
C.	Design pressure and design temperature.	
D.	Maximum pressure and minimum pressure	(2 marks)
ASN	ME VIII consists of divisions.	
		(3 marks)
ASN	/IE II focuses on	
		(3 marks)
Writ	e the most appropriate definition about pressure vessel.	
		(4 marks)
Nan	ne TWO (2) types of lifting attachments of pressure vessel.	
I.		
II.		
		(4 marks)

				(4 mark
Sta	te the main function of flang	jes used in fabi	ricating pressure ves	sel.
				(4 mark
	desired life time of a vesse major vessels and the mind		iical question. State t	he desigr
				(4 ma
Exp	lain the purpose of the vort	ex breaker.	Water level	E
			d	
			Figure 1 Schematic	of vortex bro
				(4 ma
Wri	te the necessary preparatio	n taken before	painting.	

FFD 22602 BASIC PRESSURE VESSEL DESIGN

**12.** Tall towers design considers stress conditions. List the **THREE (3)** locations where the stresses can be calculated.

(5 marks)

**13.** Sketch and describe leeward wind and windward wind.

(5 marks)

**14.** Find the longitudinal stress,  $\sigma_L$  the circumferential (Hoop) stress,  $\sigma_H$  of the pressure vessel are such that the internal pressure is 75 psi. The diameter is 130 inches and the thickness is 0.50 inches.

(6 marks)

15. The pressure of a water tank is 95 psi. The connecting pipe above the tank is17 feet. Find the static head pressure and the total pressure of the air tank.Use Table 1 provided.

Table 1 Pressure of fluid static head

(8 marks)

**16.** Pressure relief devices or safety valve is a must in terms of design consideration. State its main purpose of installation.

(8 marks)

17. With the design data given, find the shell thickness, t. Design pressure of 220 psi, material SA 515 Grade 70 @ 700°F is 18100 psi. All welds will be spot-radiographed, inside radius of 50 inches, and the corrosion allowances of 0.125 inches.

(8 marks)

- 18. Labelled and sketch the preferred shapes of pressure vessel openings? Determine the size of the opening if the inside diameter is 110 inches and 50 inches respectively. The code UG-36 through UG-43 are:
  - a) For maximum 60 in. inside diameter vessel (IDV) one half of the vessel diameter, but maximum 20 in.
  - b) For over 60 in. inside diameter vessel, one third of the vessel diameter, but maximum 40 in.

(10 marks)

19. The height of tall towers depends greatly on its functions. Loadings such as wind and earthquakes are also included when necessary. Explain with a diagram, why with different height stages, different plate thicknesses will be utilized.

(12 marks)

#### **END OF QUESTION**
