

**UNIVERSITI KUALA LUMPUR
BUSINESS SCHOOL**

**FINAL EXAMINATION
MARCH 2026 SEMESTER**

COURSE CODE : EAB21503
COURSE NAME : PRINCIPLES OF FINANCE
PROGRAMME NAME : BACHELOR IN ACCOUNTING (HONS)
(FOR MPU: PROGRAMME LEVEL)
DATE : 29 JUNE 2026
TIME : 9.00 AM – 12.00 PM
DURATION : 3 HOURS

INSTRUCTIONS TO CANDIDATES

1. Please CAREFULLY read the instructions given in the question paper.
2. This question paper has information printed on both sides of the paper.
3. This question paper consist of ONE (1) section.
4. There are FOUR (4) questions, answer ALL questions.
5. Please write your answers on the answer booklet provided.
6. All questions must be answered in English (any other language is not allowed).
7. This question paper must not be removed from the examination hall.
8. Compound interest tables and formula have been appended for your reference.

THERE ARE 7 PAGES OF QUESTIONS, EXCLUDING THIS PAGE.

SECTION A: (TOTAL 100 MARKS)**INSTRUCTION: Answer All questions.****Please use the answer booklet provided.****Question 1**

UniKL Resources Sdn Bhd. (URSB) is a private arm for UniKL. They have been approached with FOUR (4) projects with promising return. Even though their main business is trading but not limited to other kind of business as well. Apparently, their additional budget request amounted RM 2,000,000 for this year is approved with some condition. The condition is that the extra fund given to them must be invest to any business or project that generate profitable income which at least must be more than 12%. Another additional condition lay by the fund provider is that the project must be able to repay back the capital within 4 years or else the project shall be rejected and will not proceed to the next evaluation.

Hearing this, your department lay down all the projects that proposed earlier that year to be analyse. The first project is Floating Solar Farm which will be located at Serendah, Selangor. The initial investment needed for this project is RM 1,300,000. The lifespan of this project is expected to be 10 to 15 years.

Meanwhile the second project is Battery Energy Storage System (BESS) which is still new in Malaysia but rapidly growing to support the nation's 70% renewable energy target by 2050, focusing on grid stability, peak shaving, and solar energy storage. Estimated cost to run this project is RM 1,500,000 and the life span of this BESS is up to 13 years before the battery starts to deteriorate to 80%.

As for the third project, Musang King Contract Farming (MK). The life span for this project is quite long compared to the other project. The most interesting part of this contract farming is there are already 3 ready buyers from China that will buy all the fruits from this farm. Once the fruits can be harvest, it will be directly export to China. The cost of this project is RM 1,200,000.

Aircraft Repair Station (ARS) is the last project that is being proposed to them this year by UniKL MIAT. The cost of setting up this repair station is quite high since it needs an extra hangar bay and have to follow a very strict rule by the FAA regulation. The cost is estimated to be RM 2,000,000. This project is to fill the need by the private sector to repair the privately owned aircraft.

Below is the other information needed for your evaluation before you can decide which project should URSB proceed with.

	SOLAR	BESS	MK	ARS
CF1	350,000	200,000	0	150,000
CF2	350,000	300,000	100,000	250,000
CF3	350,000	500,000	350,000	250,000
CF4	350,000	600,000	350,000	500,000
CF5	350,000	800,000	400,000	500,000

Based on the data given above, your team have to decide which project is suitable for URSB to fulfill the term and conditions laid by the funder.

- (a) You are required to evaluate the business using: (16 marks)
- Payback Period and determine the company that able to proceed to the next stage of valuation.
 - Net Present Value
- (b) Based on the data that you have calculated, determine the project that is suitable for the URSB to pursue. Defend your answer with suitable justification. (7 marks)
- (c) Your higher up needs to know the exact percentage of returns from the project that your team has chosen. Compute the approximate return by using **interpolation technique**. (7 marks)

[TOTAL MARKS: 30 MARKS]

Question 2

Amirul Bakhtiar Skin Care Solution, a leader in the beauty and skincare industry, has always prided itself on innovation and forward-thinking strategies. As part of their long-term growth plan, the company's financial advisory team has proposed exploring investment opportunities to diversify their portfolio and create additional revenue streams.

Among the proposed options is a Stock Pasti Cantik (PC), Stock Nin Dia (ND) and Bond Susuk Emas (SE), known for their potential to deliver varying rates of return. In their monthly department meeting, the Chief Financial Officer (CFO) presented the details of three potential investments; Stock PC, Stock ND and Bond SE and requested you as her subordinates to carefully analyze the probabilities associated with its potential returns.

The detailed report showcasing the probability of distribution of returns is as follows:

State of Economy	Probability (p)	Stock PC	Stock ND	Bond SE
		Return (r)	Return (r)	Return (r)
Booming	0.35	15%	25%	6%
Stable	0.50	8%	10%	6%
Recession	0.15	- 10%	-13%	6%

- (a) Calculate the expected rate of return and the standard deviation on the investment of security KK and security BB.

(18 marks)

- (b) Help the CFO by suggesting the most suitable investment for Amirul Bakhtiar Skin Care Solution. Justify your reasoning.

(7 marks)

[TOTAL MARKS: 25 MARKS]

Question 3

Bergegar Corp is not a new name is frozen meat business especially burger patty. Business is doing well but currently experiencing stagnant growth, which for a business is not good. The business development department is planning to introduce a new line of products into the market, a frozen Sata. The department expects with the new line of products, the sales will be forecasted to increase by 20 percent by next year.

The idea of new product is fully supported by the board members and requires the department to plan properly for this new product. The company had historically used little planning for investment needs. The board members request the business development team to consult with the finance department about whether the company requires some additional financing or not for the upcoming new product. Below are the recent financial statements for Bergegar Sdn Bhd.

BerGeGar Corp
2025 Income Statement

	RM
Sales	929,000
Costs	- 723,000
Other Expenses	- 19,000
EBIT	187,000
Interest Expense	- 14,000
Taxable Income	173,000
Taxes (35%)	- 60,550
Net Income	112,450
Dividends	33,735
Retained Earnings	78,715

BerGeGar Corp
Balance Sheet as of December 31,2025

Assets	RM	Liabilities	RM
Current Assets		Current Assets	
Cash	25,300	Account Payable	68,000
Accounts Receivabl	40,700	Notes Payables	17,000
Inventories	86,900	Total Current Liabilities	85,000
Total Current Assets	152,900	Long-Term Debt	158,000
Net Plant and Equipment	413,000	Stockholders' Equity	
		Common Stock plus additional paid-in capital	140,000
		Retained Earning	182,900
		Total	322,900
Total Assets	565,900	Total Liabilites and Equity	565,900

Interest expenses will remain constant; the tax rate and the dividend payout ratio will also remain constant. Cost, other expenses, current asset, and account payable increase spontaneously with sales.

- (a) If the firm is operating at its full capacity and no new debt or equity is issued, compute the external fund needed (if any) to support the 20 percent growth in sales. Show your working by constructing a **pro-form financial statement** for the year 2026.
(15 marks)
- (b) Determine the internal growth rate the company can grow without relying on any external funding. Comment on your finding.
(4 marks)
- (c) Mr Hao Ah You personally disagrees with the idea from Mr Hao Do You of issuing bond in raising the capital. He prefers to borrow money directly from the bank. As an ex-banker, you stand with your option by issuing bond is much better than borrowing money from the bank. Defend your argument by giving **TWO (2)** valid reasons with explanation.
(6 marks)

Question 4

Bertayar Bhd is a listed company in the automotive industry which is more focusing on making tyres. The company are currently developing a new type of tyre that will expand the longevity of the tyre by 20% and save the environment.

The cost for its Research and Development (RnD) amounted to RM 1 million. Before proceeding with the Rnd, the company are trying to compute the cost of capital. Assume that you are an assistant to Ms Bao Kern Ching, the financial vice president. Your first task is to estimate Bertayar' cost of capital. Ms Bao has provided you with the following data, which he believes may be relevant to your task.

- The firm's tax rate is 30 per cent.
- Bertayar's wants to raise a debt as part of the capital. Since the government is trying to promote sustainability and green technology, there will be no commission fees being charged. The company currently has an 8% coupon rate, AA-rated, non-callable, redeemable bond issue outstanding, which pays interest annually, will mature in 17 years, has a RM1,000 face value, and is currently trading at RM1,075.
- Bertayar's will also be issuing new preferred stock worth RM 1 million. They will pay a dividend of RM 4 per share, which has a market price of RM 40. The floatation cost on preferred will amount to RM 2 per share.
- Bertayar's common stock is trading at RM 45.57, and its dividends are expected to grow at a constant rate of 6%. The company paid a dividend last year of RM 2.27. If the company issues new stock they will have to pay a floatation cost per share equal to 5 percent of the selling price.
- Bertayar's target capital structure is 38 percent debt, 14 percent preferred stock, and 48 percent common equity.

You are required to

- (a) Compute the cost of capital for each of the capital component if the company want to issue new preferred share and common share.
(9 marks)
- (b) Calculate the Weightage Average Cost of Capital for Bertayar Bhd.
(3 marks)
- (c) From your findings in (b), advise the company whether they should proceed or not with the project if the incremental cash flow from the project is RM 400,000 for 10 years with a cost of RM 4,000,000. Justify your findings with suitable explanation.

(5 marks)

- (d) The manager is quite impressed with your work and asks you to summarize your work by explaining **ONE (1)** reason knowing WACC is crucial to the company development.

(3 marks)

FORMULA

- $FV_n = PV (1 + i)^n$
- $PV_n = \frac{FV_n}{(1+r)^n}$
- $FV_n = CF_1 \times \left\{ \frac{(1+r)^n - 1}{r} \right\}$
- $FV_n = PMT \times FVIFA_{i,n}$
- $PV_0 = \left(\frac{CF_1}{r} \right) \times \left\{ 1 - \frac{1}{(1+r)^n} \right\}$
- $PV_n = PMT \times PVIFA_{i,n}$
- $FVA_n = CF_0 \times \left\{ \frac{(1+r)^n - 1}{r} \right\} \times (1 + r)$
- $FVA_n = PMT (FVIFA_{i,n}) (1 + r)$
- $PV_0 = \left(\frac{CF_0}{r} \right) \times \left\{ 1 - \frac{1}{(1+r)^n} \right\} \times (1 + r)$
- $PVA_n = PMT \times (PVIFA_{i,n}) (1 + r)$
- $CF_1 = (PV_0 \times r) \div \left\{ 1 - \frac{1}{(1+r)^n} \right\}$
- $PVIFA_{i,\infty} = PMT \times \frac{1}{i}$
- $DPR = (\text{Dividend} / \text{Net Income}) \times 100$
- $DPS = \text{Dividend} / \text{Number of Shares Outstanding}$
- $E(R) = \sum (P \times R)$
- $\sigma = \sqrt{\sum P (R - E(R))^2}$
- $CV = \sigma / r$
- $COV_{XX,YY} = \sum (r_{XXi} - E(R)_{XX}) (r_{YYi} - E(R)_{YY}) (P_i)$
- $E(R)_p = w_{XX} E(R)_{XX} + w_{YY} E(R)_{YY}$
- $P_{XX,YY} = COV_{XX,YY} / (\sigma_{XX})(\sigma_{YY})$
- $D_1 = D_0 (1 + g)$
- $V_B = CP (PVIFA) + MV (PVIF)$
- $WACC = \text{Sum of } ([w] \times \text{cost of capital})$
- $K_{ps} = D / (MP - FC)$
- $K_{Re} = [D_1 / (MP)] + g$
- $K_{ncs} = [D_1 / (MP - FC)] + g$
- $YTM = \frac{C + \frac{F-P}{n}}{\frac{F+P}{2}}$
- $\text{Approx. IRR} = ra + \frac{NPVa}{NPVa - NPVb} \times (rb - ra)$
