

High demand for experts in computer science

PURSuing the Master in Computer Science (MCS) programme at Universiti Kuala Lumpur Malaysian Institute of Information Technology (UniKL MIIT) could be your best option to further your studies.

Offered via mixed-mode approach and available for both full-time and part-time students, MCS lessons are taught by experienced faculty members with strong industrial backgrounds, as well as visiting lecturers, including professors and experts from renowned university partners of UniKL MIIT such as Sungkyunkwan University and Hanyang University in South Korea, La Rochelle University in France, and more.

The MCS programme has attracted a total of 38 students since it was first introduced in 2018, three of them being international students. The MSC programme aims to develop graduates who:

- Possess advanced theoretical principles and scientific methods in computing to create

effective solutions to problems and evaluate them

- Can carry out research and work on projects in which they propose, design, build, test, analyse and deliver computing solutions that meet appropriate computing standards and realistic constraints

- Are committed to lifelong learning, which focuses on professional and ethical responsibilities as well as understanding the possible social, economic, cultural, legal and environmental impact of their computing solutions in the global context to its highest level

Byte the global experience. Join us at Universiti Kuala Lumpur today. – **By Suriana Ismail, MSC programme coordinator**

- For details, visit www.unikl.edu.my or contact UniKL MIIT's Marketing and Admission office at 03-2175 4000/4146/4338.

Eligible HDR candidates are actively being sought to conduct research in crucial fields of study.
